ENTERHEALTH
Residential Addiction Treatment
Address: 524 N. Lincoln Park Road, VAN ALSTYNE
Services: Whereas twelve-step programs focus on "working the steps," the Enterhealth drug and alcohol addiction program treats the disease of addiction as a medical condition – specifically, as a chronic brain disease – and begins with a complete medical and psychological assessment and the development of a personalized drug and alcohol treatment plan. The areas of the brain that sustain injury due to alcohol or drug addiction are those that form deep physical and emotional connections between the substance and the patient's sense of pleasure. These connections make it extremely difficult for your loved one to resist using the substance, based on very real and primal urges that can take more than a year to overcome before the brain is able to "reset" itself. Using a combination of neuropsychology,

medication and psychotherapy, we can shut down cravings for drugs or alcohol, giving the brain much needed time to heal. The latest scientific protocols and medical breakthroughs that block the effects of alcohol and drugs can also lessen the effects of withdrawal and decrease cravings and desires to use. A comprehensive approach to drug and alcohol rehab which addresses the physical, psychological, neurological, relational and spiritual aspects of addiction.
